Technical datasheet

Flexam EX 8/2 0+A66 black AS FR

no

Article code: SBFL575262

| General information | | | |
|----------------------|-----------------------------|---|--|
| Product group | Synthetic Belts | Synthetic Belts | |
| Industry segment | Airports; Logistics: Distri | Airports; Logistics: Distribution & warehousing | |
| Main product feature | Antistatic, Flame retarda | Antistatic, Flame retardant, Low noise | |
| Indication of use | Slider bed, Rollers, Flat | Slider bed, Rollers, Flat | |
| | | | |
| Belt construction | | | |
| Tension layer | | polyester, stable | |
| Number of plies | | 2 | |
| Top side | material | Flexam, PVC | |
| | finish | profile, A66 Supersonic profile | |
| | color | black | |
| Bottom side | material | fabric, polyester | |
| | finish | bare fabric | |
| | color | natural | |
| | | | |
| Characteristics | | | |
| Food Grade (FG) | no | | |
| Antistatic (AS) | yes | ISO 21178 | |
| High conductive (HC) | no | | |
| Flame-retardant | yes | ISO 340 | |
| | no | | |

Technical data Hardness ISO 868 top side 55A Shore Force at 1% elongation (static) ISO 21181 8 N/mm 45.68 lbs/in. Elastic modulus (k1% relaxed) ISO 21181 5 N/mm 28.55 lbs/in. **Tensile strength** 685.22 lbs/in. KV.006 120 N/mm Rated working tension at 2% 120 N/mm 685.22 lbs/in. Thickness AB method KV.002 total 7.80 mm 0.31 in. top cover 6.30 mm 0.25 in. Weight AB method KV.004 5.2 kg/m² 1.07 lbs/ft² **Coefficient of friction** bottom against steel dynamic 0.15 static 0.17 **Operating temperature** continuous from / to -15 / 80 °C 5/176 °F from / to -15 / 100 °C 5/212 °F short Minimum pulley diameter 2.36 in. flexing 60 mm backflexing 3.94 in. 100 mm Manufacturing width standard 2020 mm 79.53 in. 2020 mm 79.53 in. maximum

Fabrication

ATEX approval

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the separate information.

Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ.

We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.

Because of continuous development, the presented data is subject to alteration. This data replaces that included in previous publications. Ammeraal Beltech excludes any liability for the incorrect use of the above stated information.
