Technical datasheet

Ropanyl EM 8/2 00+02 light blue M2 AS FG AM

Article code: SBRY577041

General information							
Product group	Synthetic Belts						
Industry segment	Food: Meat & poultry, Confectionary & candy, Bakery; Chemicals, rubber & plastics						
Main product feature	Antistatic, Foodgrade, Anti-microbial						
Indication of use	Slider bed, Rollers, Flat						
Belt construction							
Tension layer		polyester, s	table				
Number of plies		2					
Top side	material	Ropanyl, TPU					
	finish	smooth, M2	Matt finish				
	color	Light blue					
Bottom side	material	naterial Ropanol, PUR					
	finish	impregnated fabric					
	color	Light blue					
Characteristics							
Food Grade (FG)	yes EC 1935/20		04, EU 10/2011; FDA				
Antistatic (AS)	yes ISO 21178						
High conductive (HC)	no	150 21170					
ATEX approval	no						
Technical data							
Hardness	ISO 868		top side	93A	Shore		
Force at 1% elongation (static)	ISO 21181			8	N/mm	45.68	lbs/in.
Thickness	AB method KV.002						
	AB method KV.002	2	total	1.65	mm	0.06	in.
	AD method KV.002	2	total top cover	1.65 0.15		0.06 0.01	
Weight	AB method KV.002			0.15		0.01	
Weight Operating temperature				0.15	mm kg/m²	0.01	in. Ibs/ft²
-	AB method KV.004		top cover	0.15	mm kg/m² °C	0.01 0.35	in. Ibs/ft² °F
-	AB method KV.004 continuous		top cover from / to	0.15 1.7 -20 / 90 -30 / 110	mm kg/m² °C	0.01 0.35 -4 / 194	in. Ibs/ft² °F °F
Operating temperature	AB method KV.004 continuous short		top cover from / to	0.15 1.7 -20 / 90 -30 / 110 14	mm kg/m² °C °C	0.01 0.35 -4 / 194 -22 / 230	in. Ibs/ft² °F in.
Operating temperature	AB method KV.004 continuous short flexing		top cover from / to	0.15 1.7 -20 / 90 -30 / 110 14	mm kg/m² °C °C mm mm	0.01 0.35 -4 / 194 -22 / 230 0.55	in. Ibs/ft² °F in. in.

Fabrication

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the seperate information.

Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ.

We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.
