Technical datasheet

General information

Nonex EM 8/2 00+05 light blue AS FG AM

Article code: SBN0575700

Product group	Synthetic Belts							
Industry segment	Food: Meat & pou	Food: Meat & poultry, Dairy, Bakery						
Main product feature	Antistatic, Foodgr	Antistatic, Foodgrade, Anti-microbial, Oil & grease resistant						
Indication of use	Slider bed, Rollers	Slider bed, Rollers, Flat						
Belt construction								
Tension layer		polyester, stabl	polyester, stable					
Number of plies		2						
Top side	material	Nonex, PVC						
	finish	smooth, glossy	smooth, glossy					
	color	Light blue	Light blue					
Bottom side	material	Ropanol, PUR						
	finish	impregnated fa	impregnated fabric					
	color	Light blue	Light blue					
Characteristics								
Food Grade (FG)	yes	EC 1935/2004,	EC 1935/2004, EU 10/2011; FDA					
Antistatic (AS)	yes	ISO 21178	ISO 21178					
High conductive (HC)	no							
ATEX approval	no							
Technical data								
Hardness	ISO 868	top side	65A Shore					

Hardness	ISO 868	top side	65A	Shore		
Force at 1% elongation (static)	ISO 21181		8	N/mm	45.68	lbs/in.
Thickness	AB method KV.002	total	2.00	mm	0.08	in.
		top cover	0.50	mm	0.02	in.
Weight	AB method KV.004		2.3	kg/m²	0.47	lbs/ft²
Coefficient of friction	bottom against steel	dynamic	0.17			
		static	0.2			
Operating temperature	continuous	from / to	-15 / 80	°C	5 / 176	°F
	short	from / to	-15 / 110	°C	5 / 230	°F
Minimum pulley diameter	flexing		25	mm	0.98	in.
	backflexing		50	mm	1.97	in.
Manufacturing width	standard		2020	mm	79.53	in.
	maximum		3000	mm	118.11	in.

Fabrication

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the seperate information.

Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ.

We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.

Because of continuous development, the presented data is subject to alteration. This data replaces that included in previous publications.
