Technical datasheet

Flexam EX 10/2 00+A32 black AS FR /AMD

Article code: SBFL576372

General information							
Product group	Synthetic Belts						
Industry segment	Airports; Logistics: Distribution & warehousing						
Main product feature	Antistatic, Flame retardant, Low noise, Energy saving						
Indication of use	Flat, Rollers, Slider bed						
Belt construction							
Tension layer	polyester, stable						
Number of plies		2					
Top side	material	Flexam, PVC					
	finish	profile, A32 Fine rib profile					
	color	black					
Bottom side	material	rial Ropanol, PUR					
	finish	impregnate	ed fabric				
	color	transparent					
Characteristics							
Food Grade (FG)	no						
Antistatic (AS)	yes ISO 21178						
High conductive (HC)	no	100 240					
Flame-retardant	yes	ISO 340					
ATEX approval	no						
Technical data							
Hardness	ISO 868		top side	40A	Shore		
Force at 1% elongation (static)	ISO 21181			10	N/mm	57.1	lbs/in.
Elastic modulus (k1% relaxed)	ISO 21181			6.5	N/mm	37.12	lbs/in.
Tensile strength	KV.006			150	N/mm	856.52	lbs/in.
Thickness	AB method KV.002		total	2.5	mm	0.1	in.
			top cover	1	mm	0.04	in.
Weight	AB method KV.004			2.6	kg/m²	0.53	lbs/ft ²
Coefficient of friction	top against steel		dynamic	0.17			
			static	0.2			
			dynamic	> 1.0			
			static	> 1.5			
Operating temperature	continuous		from / to	-15 / 80	°C	5 / 176	°F
short			from / to	-15 / 100	°C	5 / 212	°F
Minimum pulley diameter	flexing			50	mm	1.97	in.
	backflexing			80	mm	3.15	in.
Manufacturing width	standard			2020	mm	79.53	in.
	maximum			2020	mm	79.53	in.

Fabrication

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the seperate information.

Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ.

We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.

Because of continuous development, the presented data is subject to alteration. This data replaces that included in previous publications. Ammeraal Beltech excludes any liability for the incorrect use of the above stated information.
