## Process and Conveyor Belts
### Technical datasheet

**Flexam EF 30/2 00+07 green FG**

**Article code:** SBFL570600

## General information

<table>
<thead>
<tr>
<th><strong>Product group</strong></th>
<th>Synthetic Belts</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Industry segment</strong></td>
<td>Agriculture; Paper &amp; print; Tyre</td>
</tr>
<tr>
<td><strong>Main product feature</strong></td>
<td>Foodgrade</td>
</tr>
<tr>
<td><strong>Indication of use</strong></td>
<td>Slider bed, Rollers, Flat, Troughed</td>
</tr>
</tbody>
</table>

## Belt construction

</tbody>
</table>
| **Top side** | material: Flexam, PVC  
                        finish: smooth  
                        color: green |
| **Bottom side** | material: Ropanol, PUR  
                        finish: impregnated fabric  
                        color: transparent |

## Characteristics

**Food Grade (FG)**

## Technical data

| **Hardness** | according to ISO 868  
                        top side: 70A Shore |
|--------------|----------------------|
| **Force at 1% elongation** | according to ISO 21181  
                        top side: 30 N/mm  
                        Shore: 171.3 lbs/in. |
| **Thickness** | internal AB method KV.002  
                        total: 3.40 mm  
                        top cover: 0.60 mm  
                        0.13 in.  
                        0.02 in. |
| **Weight** | internal AB method KV.004  
                        4.3 kg/m²  
                        0.88 lbs/ft² |
| **Operating temperature** | continuous  
                        from/to: -15 / 80 °C  
                        5 / 176 °F |
| | short  
                        from/to: -15 / 100 °C  
                        5 / 212 °F |
| **Minimum pulley diameter** | flexing  
                        120 mm  
                        4.72 in. |
| | backflexing  
                        120 mm  
                        4.72 in. |
| **Belt width** | standard  
                        2020 mm  
                        79.53 in. |
| | maximum  
                        2500 mm  
                        98.43 in. |

## Fabrication

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive.

For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the separate information.

## Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F) and 50% relative humidity, unless otherwise stated, individual data may differ.

We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts. Do not go below the initial elongation. Install the belt and tension until running perfectly under the full belt load.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.
