Technical datasheet

Flexam SW100 00+01 black

Article code: SBAS589530

General information

General information						
Product group	Synthetic Belts					
Main product feature	Impact resistant, Low friction back side					
Indication of use	Slider bed, Rollers, Flat					
Belt construction						
Tension layer		polyester, flexible	9			
Number of plies		1				
Top side	material	material Flexam, PVC				
	finish	finish impregnated fabric				
	color	color black				
Bottom side	material	material Flexam, PVC				
	finish	finish Brushed				
	color	black	black			
Characteristics						
Food Grade (FG)	no					
Antistatic (AS)	no					
High conductive (HC)	no					
Flame-retardant	no					
	yes	ASTM D-378				
ATEX approval	no					
Technical data						
Force at 1% elongation (static)	ISO 21181		17	N/mm	97.07	lbs/in.
Elastic modulus (k1% relaxed)	ISO 21181		8	N/mm	45.68	lbs/in.
Tensile strength	KV.006		170	N/mm	970.73	lbs/in.
Rated working tension at 2%			18	N/mm	102.78	lbs/in.
Thickness	AB method KV.002	total	3.00	mm	0.12	in.
		top cover	00	mm	0	in.
Weight	AB method KV.004		2.9	kg/m²	0.59	lbs/ft²
Coefficient of friction	bottom against steel	dynamic	0.2			
		static	0.25			
	top against steel	dynamic	0.3			
		static	0.4			
Operating temperature	continuous	from / to	-15 / 82	°C	5 / 179.6	
	short	from / to	-18 / 82	°C	-0.4 / 179.6	°F
Minimum pulley diameter	flexing		50	mm	1.97	in.
	backflexing		50	mm	1.97	in.
Manufacturing width	standard		2400	mm	94.49	in.
	maximum		2400	mm	94.49	in.

Fabrication

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the seperate information.

Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ.

We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.

Because of continuous development, the presented data is subject to alteration. This data replaces that included in previous publications. Ammeraal Beltech excludes any liability for the incorrect use of the above stated information.
