Technical datasheet

Ropanyl ESM 5/2 00+015 light blue M1 AS FG AM NF

Article code: SBRY576749

General information							
Product group	Synthetic Belts						
Industry segment	Food: Confectionary & candy, Bakery						
Main product feature	Antistatic, Foodgrade, Non-fraying, Knife edge transfer						
Indication of use	Slider bed, Rollers, Flat, Troughed						
Belt construction							
Tension layer		polyester, stable					
Number of plies		2					
Top side	material	Ropanyl, TPU					
	finish	smooth, M1 Fine	smooth, M1 Fine matt finish				
	color	Light blue	Light blue				
Bottom side	material	Ropanol, PUR	Ropanol, PUR				
	finish	impregnated fabri	impregnated fabric, PUR				
	color	Light blue	Light blue				
Characteristics							
Food Grade (FG)	yes		EC 1935/2004, EU 10/2011; FDA				
Antistatic (AS)	yes	ISO 21178	ISO 21178				
High conductive (HC)	no						
Flame-retardant (FR)	no						
ATEX approval	no						
Technical data							
Hardness	ISO 868	tan aida	024	Shore			
	ISO 21181	top side		N/mm	20 55	lbs/in.	
Force at 1% elongation (static) Thickness	AB method KV.002	hahal	1.30		28.55	•	
Inckness	AB method KV.002	total					
Weight	AB method KV.004	top cover	0.15	mm kg/m²	0.01	lbs/ft ²	
-		frame / ha					
Operating temperature	continuous	from / to	-20 / 90 -30 / 110		-4 / 194 -22 / 230		
Minimum nulley dismotor	short	from / to	-		•		
Minimum pulley diameter	flexing			mm	0.2		
	backflexing			mm	0.79		
Manufacturing width	standard		1900		74.8		
	maximum		1900	mm	74.8	ın.	

Fabrication

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the seperate information.

Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ. We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.

Because of continuous development, the presented data is subject to alteration. This data replaces that included in previous publications.
