PRODUCT
Ziplink®
PROCESS
Wood Panel Application

#### Situation

Plants have many belts transporting abrasive wood boards to 110  $^{\circ}$ C. Customers often have problems with the opened belts because of accidents and wear... this means many hours spent on belts replacement.

#### Solution

ZipLink® belts are ideal for any application in which belt replacement time is a significant issue.

This innovative belt family is designed to offer benefits in many applications within the Panel Board Industry: grinding, cooling, sanding, polishing, braking, sawing, painting and pre-compressing.

- 560207 Nitrile BX EZP 10/1 01+C37X blue
- 560209 Nitrile BX 10/1 01X+C37 brown

## Benefit & Advantges

- Less downtime
- Less maintenance costs
- Less in-house stock
- Less people needed for installation
- + Constant strength at all types
- + Best heat and wear resistance
- + Strongest joint
