SAFE & CLEAN

Ammeraal Beltech's new belt concept

SAFE & CLEAN

NEW SAFE & CLEAN BELTS CONCEPT WITH AMMERAAL BELTECH

Food safety is more important than ever! As a leading producer of process and conveyor belts, particularly for the food industry, Ammeraal Beltech develops new generations of products and solutions focusing on hygiene – the cornerstone of your business. Confidence in food safety is paramount when choosing a belt supplier in the food industry.

The new modular **uni UCB** (Ultra Clean Belt) and the homogeneous **Volta SuperDrive**™ belts prove this. New belts made within the **SAFE & CLEAN** concept adhere to the highest levels of hygiene and cleanability.

SAFE

Ammeraal Beltech provides a Food Safety solution based on:

- safe products comply with international standards such as EC 1935/2004 and FDA
- belt design, colors and materials, that help you achieve your ISO 22000 requirements (previously HACCP).
- innovative solutions to avoid migration
- · full belt material traceability records

CLEAN

Ammeraal Beltech provides cleanable belts:

- easy and fast cleaning of belts
- cleaning cost drastically reduced
- lowest amount of water, detergent and labour time required
- cleaning in motion possible
- control of cross contamination due to blue belt/food product

Ammeraal Beltech member European Hygienic Engineering & Design Group

Food Grade belts comply with EC 1935/2004 and FDA standards supporting your ISO 22000 requirements (previously HACCP)

SAFE & CLEAN Reduces your Cleaning Costs and Energy Consumption

In your slaughterhouses, operational costs will drop and efficiency will improve drastically using the **SAFE & CLEAN** belt solutions: uni ECB and Volta Positive Drive belts enable you to improve hygiene to a level never seen before. Resources needed to clean the belts are reduced – less water, less energy and less man hours. uni ECB and Volta Positive Drive belts are taking cleanability one step further.

uni UCB

uni UCB offers impressive performance as a light-weight belt; it's a competitive alternative to heavier and more expensive belts.

What's more, it's easy to operate, maintain and clean. In your production environment less water and cleaning chemicals are needed, meaning lower energy costs and CO2 footprint.

Volta "SuperDrive

Volta SuperDrive™ homogeneous thermo-welded belts are designed to combine a smooth, durable surface with positive drive and tracking technology for ease of cleaning and sanitation. Materials resist cutting and gouging, require no fabric reinforcement and are designed free from entrapment areas, eliminating microbial contamination.

Belts do not require pre-tensioning, allowing the belt to operate stress-free and permitting easy access to the underside of conveyor belt and support deck.
