

# Wood-based Panel Board Bunker & Scaling belts

The Silam EZP 8/1 0+01 red HR can be installed without disassembling the machine; thus saving a lot of time. In addition the silicone impregnation is less sticky than the PVC/PU alternatives used.

A weighing belt should have no tolerances. In the frame there is very little space to splice the belt endless.

For this reason, the frame is taken out of the machine, the belts get spliced and the frame is re-installed.

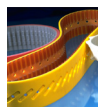

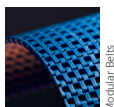

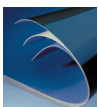

This process typically takes 2-4 people up to 8 hours.

## Belts used for bunkers are:

514471	Flexam EM 12/2 00+07 dark green M1 AS FG
513284	Flexam EX 15/3 0+10 black M2 AS FR
574601	Flexam EX 10/2 0+05 black M2 AS FR

## Belts used for belt scales (weighing):

583060	Silam EZP 8/1 0+01 red HR / 6mm
