

‘We understand your processes!’

AMMERAAL BELTECH AT TIRE TECHNOLOGY EXPO 2019

Alkmaar, The Netherlands: Global belting specialists Ammeraal Beltech will once again attend this year’s Tire Technology Expo in Hanover, 5-7 March, to introduce show visitors to their focussed products for the tyre industry.

Unique tyre solutions

For years, Ammeraal Beltech has worked with the tyre industry, supplying belting solutions for all the processes involved in tyre production. The company’s belting materials deliver high performance levels for conveying and processing all kinds of rubber compounds and components, and some are also excellently suited to applications outside actual conveying tasks. Examples are Ammeraal Beltech’s unique solutions for storing tyre components and/or green tyres prior to curing.

On the company’s stand at Tire Technology Expo, visitors can inspect and experience the seamless cones options for the ‘Green Tyre Tray’ and non-stick material for green tyre storage.

In fact, as Ammeraal Beltech’s Global Industry Segment Manager -- Tyre, Hauke Paul, tells potential TTE visitors: ‘With our broadest range of belting solutions for the tyre industry, we have really got you covered!’

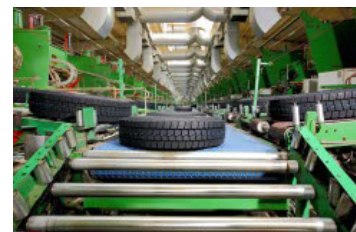

One-Stop Belt Shop

Of course, materials for separation products are only part of the company’s respected ‘One-Stop Belt Shop’, which serves the requirements of tyre production across a wide variety of applications, from the mixing area to final finishing. It includes solutions for specific rubber and tyre needs -- such as materials that are heat-resistant, non-stick and easy-release -- to maximise the quality of rubber compounds, tyre components and finished tyres, as well as increase machine availability and production output.

Hauke Paul and the Ammeraal Beltech team will be on hand to welcome visitors, discuss their application challenges, and advise on appropriate solutions, on Stand 10008 in Hall 21 at Tire Technology Expo 2019.
