

ENERGY-EFFICIENT BELTING :

Major Ammeraal Beltech product launch at Inter Airport Europe 2019

Process and conveyor belting solutions must meet the highest performance standards in the complex, extended, and necessarily secure environment that is an airport – so Ammeraal Beltech's up-to-the-minute, global range of solutions for the industry are the proven partners.

The Ammeraal Beltech team will be ready on Stand 1570, Hall B5 in Munich to advise visitors about the best belting solutions for their specific conveying challenges -- be it for baggage check-in, scanning, transportation, sorting or loading – and, importantly, to introduce new thinking on energy-efficient solutions.

The show will be the location for the launch of major new developments in this sphere for Ammeraal Beltech, bringing ground breaking energy-saving products to a range that already includes some of the most trusted and used belts in the industry.

The range of established products in Ammeraal Beltech's 'One-Stop Belt Shop' portfolio is already extensively used in major airports around the world, and the company's stand at Inter Airport Europe 2019 is designed to provide both a reference source and a source of ideas for visitors' task-specific design solutions for airport belting.
