

Product Information Sheet

AMMdrive Small Pulley range

Meet the smallest transfer diameter in all of positive drive conveyor belting.

We are expanding the AMMdrive positive drive fabric belts range to offer you the best of both traditional fabric belts and modular belts. The latest addition to the range is AMMdrive Small Pulley.

The AMMdrive Small Pulley range is designed for bakery and confectionery applications requiring compact and hygienic conveying with precise product transfer.

Thanks to our compact PRO mini drive lug technology, the belts handle pulley diameters as small as 15 mm, enabling seamless nosebar transitions and tight layouts without compromising tracking or sanitation.

FEATURES

- Suitable for pulleys as small as 15 mm
- Available in TPU and TPE materials
- Different top surface profiles
- Optimized PRO mini lug geometry
- Supports nosebar and edge transfers
- Adjustable lug configurations
- Designed for low-tension systems

BENEFITS

- Reliable tracking without tensioning devices
- Less product loss at transfer points
- Fast installation, low maintenance
- Extended belt and component lifetime
- Requires no tracking guides or expensive automatic tracking systems
- Compact and lightweight conveyor design
