

# uni Flight with Integrated Round Bar

## Maximize belt life with the FRB Flight

### Introducing the Best-in-Class uni Flight for Fish Processing

Experience the future of fish processing with our innovative Flat Round Bar Flight – a new fabrication designed by Ammeraal Beltech’s experienced modular engineers.

The Flat Round Bar Flight (FRB Flight) from Ammeraal Beltech is designed to revolutionize fish processing by providing a comprehensive solution to common industry challenges. Its focus on food safety, reduced damage, cost savings, and hygiene makes it the top choice for fish processing applications. Experience improved efficiency and product integrity with this innovative solution.

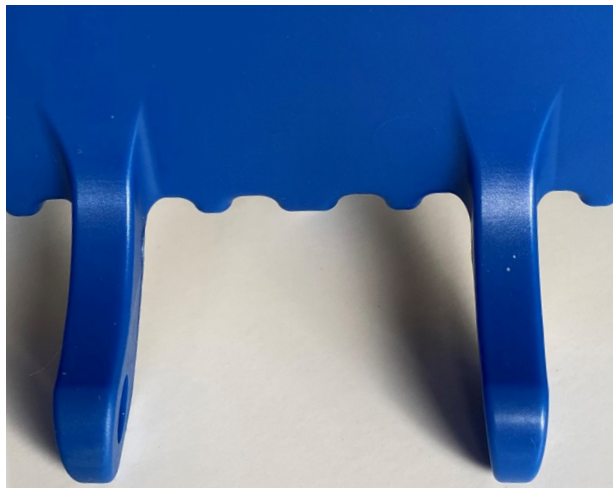

**Compatible with our popular MPB 25% Open belt!**

### FEATURES

- Single, large integrated flight
- Increased lateral stability
- Hygienic design
- Available in 2 large single length sizes
  - K1520 to fit K1800 SL belt with 1 flight and 34mm indents
  - K2120 to fit K2400 SL belt with 1 flight and 34mm indents
- Can also be cut to use on smaller belt widths
- Multiple flights can be used for belts wider than 24"

### BENEFITS

- Food safe; prevents foreign body contamination and bacteria traps
- Minimized damage to belt, flight, and product
- Extended belt lifespan
- 100% dewatering between flights
- Gentle on fish skin and other fragile food products
- Easy installation
