

uni RTB M1 and M2 in PA 6.6 GREY

uni RTB – Best-in-class in roller-top modular belts

Our uni RTB belt is the most flexible and reliable rollertop belting solution for conveying your products. A range of options for roller positioning and a choice of roller diameters make uni RTB the smartest straight-running modular belt available, and the best choice for your operations.

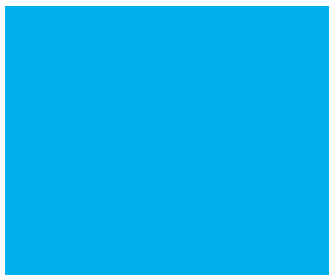

Ammeraal Beltech's Pinless Snap Link® design guarantees easy on-site assembly and long-term product reliability; no pins are used to join the belt links, so there are no problems with pin retention or removal.

What's more, the flexible nature of modular construction means that our uni RTB belts can be reconfigured and reassembled in different combinations to suit any new application needs.

KEY ADVANTAGES

Competitively priced but with more benefits, including:

- Outstanding versatility in roller orientation and height
- Durable Pinless Snap Link® design and impact-resistant material for long-lasting belt life
- Good temperature resistance for hightemperature applications
- Flame retardant material – outperforms competition on fire safety
- Minimum line pressure for gentler product handling
