Endless Woven AmSqueeze Belts for Separating

Especially in the food industry products are being refined or recovered. In this industry some primary products such as carcasses, fat, meat, bones are separated with separator machines.

Ameraal Beltech offers a flexible squeezing belt for these heavy applications.

Typical industries
- Meat & poultry
- Fish
- Fruit & vegetables
- Other industries: cheese, sausage, butter, toothpaste and chemicals

Benefits
- Non-cracking covers
- High yield
- Improved lifetime
- Less waste

Belt features
- Rigid belt construction
- Easy to clean surface
- Wear resistant covers
- Different profiles available
- Food Grade (EC, FDA)
**Innovation & Service in Belting**

**Food Safety technology**

A separating machine is designed to separate soft and solid components, e.g. meat from bones.

A separator belt transports product to a perforated drum and squeezes the softer material through the perforation. The harder particles remain outside the drum.

This continuous process ensures a smooth separation:
» in the meat industry;
» in the fish industry;
» for fruit and vegetables processing: refining of juice and puree;
» in waste disposal and recycling of e.g. cheese, sausage, butter, toothpaste, chemicals etc.

**Product benefits:**
- Non-delaminating Food Grade belt covers on special designed endless woven fabric without seam.
- The topside of the belt is provided with profile A93 Rhombus for optimum grip and cleanability. Other profiles, e.g. A24 Herringbone, A18 Fine Square are available.
- The polyurethane belt covers ensure wear resistance and a long belt life.
- Completely sealed belt edges offer optimal hygiene conditions.
- Extended experience with belts for various brands of separator machinery.
