Depanner Belts
for the Bakery Industry

Ammeraal Beltech has developed specific process belts for depanner applications in the bakery processing line.

These belts are ideal for in-line depanning of a wide variety of baked products such as bread, buns and pizza.

Ammeraal Beltech Depanner Belts are a Food Safe and efficient solution for industrial bakeries and will perform even when dealing with varying and complex surfaces.

High Temperature Resistance
Food Safe & Reliable Depanning

Innovation & Service in Belting

Suction Cup Technology

The highest quality silicone rubber is precision molded into a variety of flexible, extremely durable depanner cups. Food Grade depanner cups are rated for temperatures ranging from -51°C (-59.8°F) to +204°C (+399.2°F).

Bread depanner suction cups and retainers are a vital necessity to many bakery operations. The suction cup retainers provide the most time efficient method of installing and removing both the cup and retainer, which is now as easy as turning a screw. The unique "twist-in" feature will reduce your maintenance downtime with rapid insertion and removal of retainers and suction cups. Retainers are made from Food Grade metal-detectable material.

Main belt features

- Food Grade belt top cover and accessories
- Heavy Duty 3-ply design
- Excellent oil & fat resistance
- Laterally stable belt construction
- High temperature resistance
- Designed to fit all retainer rings

Customer benefits

- Reliable depanning
- Food safety
- Easy and quick replacement of retainer rings and suction cups
- Extended belt life time

The unique “twist-in” tool provides the most efficient method to replace cups and retainers, reducing your maintenance downtime.
