For your high-speed cases, aim high with the 54790 RAPPLON® GG S06.70 RP6C

Made of carboxylate rubber covers to prevent slippage and ink contamination. Design features such as the polyamide foil tensile member ensure continued accuracy in operation.

Flexo Folder Gluers with natural rubber cover for more output and less downtime

Feeder Strap for Bobst Martin Flexo Folders
It is highly abrasion-resistant and easy to perforate for vacuum support, making it a perfect solution for this application.

Flexo Folder
The 56420 RAPPLON® TG E12.65 FC is a well-known industry solution for flexo folders. Application tests have shown a high level of friction that allows the belt to pull and hold the blank during the folding operation, without slippage between the belt and the blank (slippage would produce problems such as jamming, skewing, ink smears, uneven folds or glue seams). This means the operator doesn’t have to lower the operating speed of the machine, which would reduce production output and profit.

Flexo Folder Gluers

- **Features**
  - Ultra high grip natural rubber cover
  - No maintenance
  - Excellent belt tracking, no re-tensioning of belt, excellent hold of mechanical fastener

- **Advantage**
  - Highly abrasion resistant surface
  - Longer periods without downtime
  - Higher production speed, quick replacement possible

- **Benefits**
  - Extra long service life
  - Longer periods without downtime
  - Higher production speed, quick replacement possible

Flexo Folder
Many producers use P6-type (rough top) PVC or rubber surface coatings where the structure wears off rather quickly and varies the friction of the belt against the box. Natural rubber is our solution to avoid jamming and skewing.
