Ropingyl Premium Plus

Our highly regarded Ropingyl belts series now features a Premium Plus range.

Our new belts bring you all the classic advantages of Ropingyl and more – with our Premium Plus series, constructed with superior fabrics and a brand-new non-shrink treatment, we can help reduce system and maintenance costs while boosting output, supporting food safety and preserving the quality of your product.

Whether it’s for food handling, knife-edge conveyors or a packaging line, our new Premium Plus belting solutions provide the answer.

Ropingyl Premium Plus:
- ultra-flexible
- easy tracking
- leading non-fray performance
- excellent release properties
- almost invisible joint
- shrink-less
Ropanyl Premium Plus gives you the advantage

Your conveying solution is at the heart of your business operation – with the Premium Plus advantage, you can keep it running more efficiently, more productively and more economically.

**Flexibility** – because our Premium Plus belts are so flexible, there’s less tension and strain throughout the conveying system. This reduces requirements and costs for both energy consumption and structural hardware, cuts down on component wear and increases belt life.

**Easy tracking** – the new generation of Premium Plus are made with strict tolerances on thickness and straightness able to obtain good tracking during installation in a short time.

**Durability** – our Premium Plus non-fray technology means our Ropanyl belts are stronger and tougher than ever, so they run longer, remain intact longer and deliver even better food hygiene by reducing fabric fray contamination.

**Shrink-less** – Premium Plus belts are specially designed and manufactured to reduce the risk of shrinkage and maintain optimal tracking, even under the most demanding food industry conditions, so that your conveyor system continues to run smoothly and efficiently.

**Non-stick** – the Premium Plus matt finish surface delivers excellent release properties for even the most challenging materials. Its non-stick properties ensure cleaner and extra-smooth transfers at all knife-edge points, safeguarding your product quality and cutting down on belt cleaning time.

**Almost invisible splice** – new belt recipes are made with top covers and innerlayer colours that result in an almost invisible splice.

Ammeraal Beltech’s new Ropanyl Premium Plus Belts meet or exceed the strict hygiene requirements of the food industry.

**Work with the best!**
