

GAD

– Your professional partner for automotive services

Bring back the rental car as well as the car key, that's it: For customers of rental car companies the process of renting usually ends with returning the vehicle.

But for the GAD-team the professional work starts now. The car needs to be inspected, refueled, cleaned and equipped with products of each car rental company. Eventually, the car will be parked at its determined location. This needs to happen as soon as possible to guarantee that the car can be rented again in shortest time.

Perfect logistics. Best performance.

As one of the leading companies in the branch of car rental services we take over all tasks on which a fast and trouble-free turnaround- management is based. We supply the biggest car rental companies in Germany by providing a professional, reliable and flexible service which is done by more than 600 employees.

Professional car washing systems as well as reliable and safe conveyor belts

Everybody can wash a car but due to our state-of-the-art facility we are able to clean thousands of cars very quickly. To assure that every vehicle gets the care it needs our carwashes consists of several conveyor belts which are constructed to handle individual volumes of orders.

In view of our service times from daily 5 am to 12 pm we can only rely on trust worthy conveyor belt suppliers and their products.

To meet these challenges also in the future we decided to modernize our conveyor belts used in our carwashes.

Convinced by the reputation of Ammeraal Beltech we launched a project in which the Ammeraal Beltech belts were installed the very first time in car washing systems. Having used this belt system for 6 months now, we are persuaded by its dependability. In comparison with belt systems utilized before we noticed the following **advantages**:

- high durability due to an exceptional workman ship
- usage of only high quality components
- nearly maintenance free
- tear-resistant and robust
- high failure safety
- exceptional technical support

Given these facts, the failure probability of the carwash equipped with Ammeraal Beltech belts dropped to zero. Therefore our operating procedure is guaranteed on each day of the year now. We can confirm that the conveyor belt system of Ammeraal Beltech is also well proven in car washing sector.

Environment

To keep the environment clean we steadily set new standards. To save resources we keep consumptions on a low level by using most modern technology. Furthermore, all maintenance products are proven regularly. With these methods we ensure that our results will meet also in future the high quality requirements of our customers.
